Question feq1

```
public class Model {  
    // fields  
  
    // constructor  
    public Model() {  
  
        // DEV USER  
  
    }  
  
    // method 1  
    public void method1(int val) {  
  
  
    }  
  
    // method 2  
    public String method2() {  
        return null; // stub  
    }  
}
```

Question feq2

```
public class Inventory {  
    // fields  
  
    // constructor  
    public Inventory() {  
  
        // DEV  
  
    }  
  
    // method 1  
    public void method(int val) {  
  
    }  
}
```
